THE BULL BLOT TEST

There's something wrong with you. I know it, you know it, your family and friends know it. I'm sure you've wondered to yourself many times before, "what the hell is wrong with me?" Why go through the hassle of paying for a psychiatrist to find out answers you can get from a quick, easy, *extremely accurate* ink blot test instead? With my extensive background of one Intro to Psychology course, I feel pretty qualified (maybe too qualified) to be administering this. I'm confident we'll be able to figure out once and for all just what the hell is wrong with you.

To begin, choose what would be the best description of the image and write it's corresponding letter in the column "1st". If there is a second description that fits well too, mark it in the column "2nd." If not, leave it blank:

- A: Gnomes
 - B: A silly bearded face :P
 - C: A bloody spinal column
 - D: Dog
 - E: Something else
- | | | |
|--|--------------------------|--------------------------|
| | 1st | 2nd |
| | <input type="checkbox"/> | <input type="checkbox"/> |

- A: Lads having lunch
 - B: Capybara business meeting
 - C: Discussing funeral plans
 - D: Butterfly
 - E: Something else
- | | | |
|--|--------------------------|--------------------------|
| | 1st | 2nd |
| | <input type="checkbox"/> | <input type="checkbox"/> |

- A: Dragons about to kiss
 - B: Two Marios in toupees
 - C: A mushroom cloud
 - D: Seahorse
 - E: Something else
- | | | |
|--|--------------------------|--------------------------|
| | 1st | 2nd |
| | <input type="checkbox"/> | <input type="checkbox"/> |

- A: Witches brewing a potion
 - B: Two monkeys in love
 - C: A screaming face
 - D: Another dog
 - E: Something else
- | | | |
|--|--------------------------|--------------------------|
| | 1st | 2nd |

RESULTS

If you answered mostly A's... You live in a world of fantasy. You need to come to terms with reality, because this place you call "Great Britain" doesn't exist and never will. So stop talking about it. I'm getting real tired of you. Get with the program and be a contributing member of a capitalist society like the rest of us.

If you answered mostly B's... You need to take yourself more seriously. It's starting to affect your emotional development. Listen, this is the real world of Granville, Ohio--the city that never sleeps. No one is going to stop to help you out here. You're all alone. Help yourself by growing UP!!! Come find me when you're ready to actually talk business.

If you answered mostly C's... You are scary and people are scared by you. Your answers are actually a little concerning and frightening! I believe you may be a harm to yourself and others. I've already contacted law enforcement and they will be coming at any second now. It's for the greater good of society that you be placed in federal care.

If you answered mostly D's... You just don't think. Your brain is like a giant fish bowl with a moss ball floating around inside, or a tumbleweed rolling through the desert. On a good day, a comprehensible thought might pop into that skull of yours. Maybe keep taking this test until you gain the ability to generate some.

If you answered mostly E's... You have no sense of self. In fact, you may not even have a self. Really, you are just an empty husk that happens to be made of flesh and bone. Did you really think this test was going to help you figure out who you truly are? Your efforts are futile. Your attempt is in vain.
