AN OPEN LETTER TO DENISON'S PUBLIC

To the students of Denison University,

Open letters are a staple of the power of the press. Many open letters have swayed the minds of the public and the heart(shaped hole)s of politicians. So today I wield this power entrusted to me carefully and precisely. Specifically, I wield it towards my fellow classmates who sit in front of me and play 2048. Time after time I see bright minds shift their focus and attention to these little yellow and orange tiles and yet remain absolutely horrible at the game. I've seen students who play for weeks and weeks and never get past the 256 tile. It's not hard, it's not economics class (where I often play this game), everyone with a brain knows you have to try and keep your highest tile in a corner, that way it will not get stuck between twos and fours it can't merge with. What's that? You didn't know? Maybe go play something more your level like the "Dinosaur Game". I apologize if I sound peeved, but this is a topic I feel very passionate about. This letter needed to be written. I consider this my biggest contribution to not only this campus but to this great nation. You may disagree, you may even continue to play 2048 atrociously on purpose out of spite but years from now my name will be included among the greatest political and social activists for my plea for my fellow classmates to get good.

Thank you.

P.S

My high score is 31516. If you can do better please email me at Not_A_Real_Email_Dummy@yahoo.net. The highest score wins the biggest waste of time award and a book on time management. Good luck!

2048 Maestro
